

HE SB 7000

The HE-Technology HE SB 7000 single lane swing barrier turnstile is an elegant high-performance entrance control system designed for high-traffic volume.

The HE SB 7000 is a single lane swing barrier turnstile series designed for smooth and silent operation and draws very little power. It is made of stainless steel which makes HE SB 7000 highly durable.

HE SB 7000 barriers are normally held in a locked position, thus denying access to the secured side. Upon SBTL5000's reader (RFID and/or fingerprint) positively recognizing a user's valid access card or fingerprint, its barriers swing automatically, thus allowing users passage to the secured side.

HE SB 7000 provides both security and convenient space, all in a very durable and elegant compact design.
